RASYM... DA, RASYM... SR Series Scotch Yoke Arctic Environment

- Arctic environment (-50°C ... 80°C) actuators are suitable for very cold environment until -50°C with long life time. These actuators are used for automatic control of rotary valves with compressed air.
- Arctic actuators are 2 types; single acting (spring return), double acting (air/air).
- Long lasting and high performance
- These actuators are designed for operating at minimum -50 °C ambient temperature.
- For using these actuators without any problem at -50°C, feeding air must not contain water particles at all, suitable air dryers must be used.
- These actuators can be used in -50°C ambient temperature without any power reduction for a long time.
- Sensitive and high quality bearing and o-ring parts
- Actuator bodies have aluminium extruded against corrosion.
- To operate these actuators, suitable namur valve (-50°C) must be used.
