

Water Hammer Solenoid Valve S1110 Series (G 3/4", G1")

GENERAL FEATURES

- New design
- TORK series S1110 (N.C.) diaphragm solenoid valves are 2/2 way and pilot operated.
- Suitable for non-aggressive liquids (water, light oil etc...) gaseous fluids (air, inert gases etc...)
- Minimum operating pressure differential 0,5 bar.
- Wide pressure range, flow rate and orifis options.
- Solenoid valves are used with filters.
- Solenoid valves can be mounted in any position without affecting its operation, coil to be used in a vertical position.
- No pressure difference is required.
- S1110 solenoid valves open quickly; their closing adjustment can be adjusted by rigging screw and they can remain open continuously by adjusting their rigging screw when it needs to stay open for a long time.
